# FOREWORD

This Texas County Statistics Bulletin presents 1980 agricultural statistics for each county on a single page. The statistics have been made possible by the Texas Legislature which provided the Texas Department of Agriculture with funds for the operation of an annual county data program. The project is in cooperation with the Statistical Reporting Service of the U.S. Department of Agriculture.

Individual sheets showing all of the data for a given county are available separately. Also available upon request are commodity bulletins showing statistics for all Texas counties for Small Grains; Vegetables; Fruit and Pecans; Livestock, Dairy and Poultry; Field Crops (including Cotton); and Cash Receipts and Prices Paid.

Many individuals and organizations support and make possible these county statistics, but I want to especially thank the farmers and ranchers who have furnished the basic data for their operations. At the same time, I would like to congratulate them for their efforts in producing food and fiber in Texas; these statistics attest to the fact tht during 1980 Texas ranked third in the nation in agriculture, with $9.2 billion received for farm commodities during the year.

Sincerely,

Reagan V Brown
